

Shelter Maintenance Service

Macemain + Amstad are committed to ensuring that all our shelters remain fit for purpose throughout their operational life. We are therefore launching our 'Shelter Maintenance Service'.

A regular maintenance programme will ensure:

- Shelters are maintained to a recognised standard
- Timely repair and utilisation of correct and original manufacturer's replacement parts
- Ongoing maintenance by specially trained maintenance teams
- Safe, pleasant and well maintained environment for your customers

The Shelter Maintenance Service can include one or all of the following:

- One off Shelter Renovation
- Regular Shelter Maintenance Service Programme
- Reactive Shelter Maintenance Service

Shelter Renovation

Macemain + Amstad will work in conjunction with the client to identify shelter renovation works required on a site specific basis. A one off Shelter Renovation Schedule will be defined clearly identifying the scope of works to be undertaken at each location. Our trained maintenance crews will undertake all renovation works as agreed with the client to ensure shelters are brought up to an agreed standard.

Shelter Maintenance Service Programme

Macemain + Amstad will undertake regular maintenance work on shelters at intervals to be agreed with the client. This will ensure that all shelters are maintained to an agreed standard. The scope of regular maintenance work including glass replacement, glazing bar replacement and graffiti removal will be clearly defined. A shelter maintenance service programme will provide the scope of inspections and any subsequent maintenance work to be carried out.

Reactive Shelter Maintenance Service

Macemain + Amstad can provide a shelter maintenance service which is reactive to field events as they occur. This service would be managed electronically and would enable replacement of the damaged components within agreed response times. All works would be undertaken by trained maintenance crews.

For further information on our new Shelter Maintenance Service and an informal chat about your requirements please contact Alan Neal, Sales Executive on 07802 787800 or our Sales Team.
