

**MACEMAIN + AMSTAD**

Cycle Parking

# Cycle Shelters

Macemain + Amstad specialise in the design, manufacture and installation of architectural structures, waiting enclosures and street furniture. We offer three standard ranges of modular shelters. Standardised components enable us to offer a variety of shelter configurations covering roof shapes, glazing and accessories.

The Ashford shelter comprises an aluminium framework and 'H' rib securing UV stabilised 3mm clear polycarbonate. Polyester powder coated in any RAL colour. Alternative materials and finishes are available.

The Devizes Shelter comprises a mild steel or 3mm clear polycarbonate roof, front and rear rails with columns galvanised finish. Alternative materials and finishes are available.

The Paragon Shelter comprises mild steel columns and aluminium extrusions and three glazing system options: tab fixed glazing; tab fixed mid rail arrangement, or; rebated frame, as standard. It can also be provided with a roof and columns only, no side panels. The paragon shelter comes with integrated drainage as standard and optional lighting. The Paragon is based on 1500mm modular construction in both its length and width but is adaptable so that all site dimensions can be maximised.

A bespoke design service is offered for non-standard or special projects requiring a unique solution.

Standardised components enable us to streamline the design and specification process, resulting in significant cost savings and significantly reduced lead times.

Macemain + Amstad offer a range of contemporary cycle shelters to compliment the receiving environment. Prices start from £1800.00.

# Cycle Compounds and Lockers

Macemain + Amstad shelters are of a modular construction which enables an infinite number of configurations for high security compounds and lockers. A range of locking mechanisms are available to meet customer requirements. Further information is available upon request.

# Cycle Stands and Racks

Macemain + Amstad offer a wide variety of cycle stands and racks.

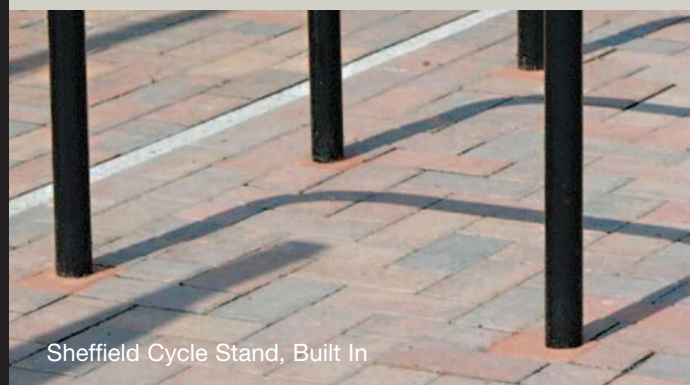

The Sheffield Cycle Stand is available singularly or in a toast rack design of varying lengths. It is available in two standard diameters of steel tubing, 50mm or 38mm, either built in or surface fixed. A wall mounted version is also available. Prices start from £40.00 for a single stand with further discounts for volume orders.

Signage boards and contrasting materials can be incorporated as required.

Alternative cycle stands, such as the 'cycle pin' and a bespoke design service are available upon request.

## Available Finishes

All cycle shelters and stands can be produced in a galvanised finish, polyester powder coated in any RAL colour or plastic coated (PPA) in one of our standard colours. All products can be provided in stainless steel or a combination of finishes.

Cycle shelters and stands can be ground fixed or built in. Macemain + Amstad offer a full design, manufacture and installation service. All systems are designed to require low maintenance.

For further information on Macemain + Amstad's range of cycle parking products please contact our technical sales advisors.
