## PRODUCT FOCUS

ISSUE NO 3 | APRIL 2023 | QUARTERLY NEWSLETTER

### KIOSKS

---

#### Fits the brief

Our standard products can be adapted to your requirements, whether this is a unit providing staff welfare accommodation or a passenger assistance/information kiosk. We can incorporate branding and a wide range of design aspects. Our unique bespoke design service, in combination with our modular components, enables clients to mix and match, creating a virtually limitless portfolio of configuration that can significantly enhance your developments. Our approach streamlines the design and specification process reducing costs and lead times for our clients.

Catering for projects of all sizes, our kiosks and products are scalable so you can achieve the design you need...

## Tailored to your requirements

We provide a complete turnkey solution from design through to manufacture and installation.

The design concepts of the waiting enclosure have been taken to the next level by Macemain + Amstad to provide an experience with a greater variety of potential services, facilities and flexibility within a single unit. These may be used as a stand alone kiosk or part of group. From informational kiosks through to gatehouses, sentry posts, welfare pods, car parks, forecourts, recreational and retail units, we can create and deliver the design you need! These can include any combination of the following:

- Fully integrated modular building providing a range of staff accommodation and visitor facilities
- Staff welfare accommodation: office, kitchenette, mess room, washroom/toilet(s) and store room(s)

- Fully secure ticket office area incorporating comfort cooling, heating and split-height ticket counter with security sonic window and doors
- Customer waiting area with comfort heating and cooling and seating
- Retail units providing a valuable revenue stream for our clients: serviced kiosks with comfort heating and cooling, waste and plumbing, water, power and data services,
- Information/assistance kiosks and open plan information desks for visitors, customers and passengers
- Variable roof design and materials including solar power and green roof
- Full length canopies to provide visitors and staff weather protection
- Quality materials and attractive design: stainless steel and other metal finishes, timber, zero carbon composite materials, toughened glass, bumper rails, non slip flooring and entrance mats
- Automated push button door(s) with full height pocketed safety screen and/or swing door(s)
- Windows with or without security shutters
- Numerous colour options and finishes internally and externally
- Graphics and logos incorporated
- Open plan, or partitioned providing optional facilities within a larger unit
- DDA compliant toilet(s)/washrooms
- Fixed and movable furniture
- Customer information systems, help points and CCTV
- Power points, LED Lighting, panels, monitoring technology
- PIR and touch timers, networking and operating systems
- and much more.

## TRANSPORT HUBS

## Transport into the future – Improving public travelling

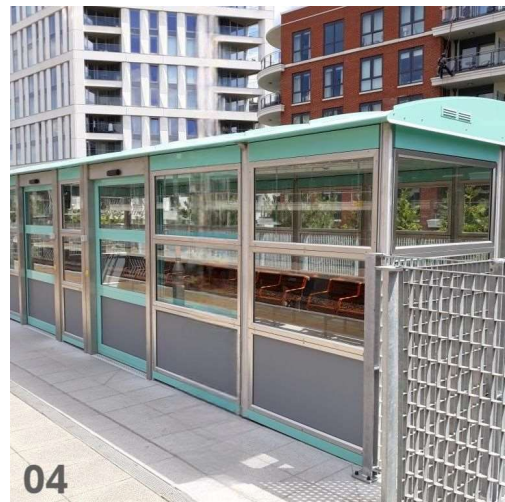

Macemain design, collaborate, manufacture and deliver quality passenger infrastructure to our clients from individual bus shelters, to extensive bus shelter island stops, railway shelters, kiosks, covered walkways for transport interchanges and glass walkways for airports. We specialise in bus station and terminal design, port, rail and tram waiting shelters and gateways. We have a range of mobility hub components available in our range of products below. If you have a project on a larger scale, we would love to hear from you as we are always looking to explore other opportunities. Do you have a vision and need somebody to make it for you? We manufacture in the UK and we have completed several bespoke designs for our customers.

Transport hub components we can offer are:
